Frontend

- React-Native
- FlutterFlow
- XML

Database

- SupaBase
- Firebase
- Oracle/MySQL

Backend

- Java
- Kotlin

AI Agent

- n8n
- Make.com

LANGUAGES

English , Hindi , Gujarati

ABOUT ME

Professional Mobile Application Developer with hands-on experience in building, deploying, and maintaining high-quality Android and cross-platform applications. Proficient in React Native, FlutterFlow, XML, Java, and Kotlin, with strong expertise in Android Studio, GitHub, and Play Store APK deployment. In addition to mobile development, I design and develop AI agents and automation workflows using tools like n8n and Make.com, delivering intelligent, scalable, and business-focused solutions.

PROJECT

- **E-Commerce Application (SPORTLETIX)**
Tech Stack : Android , XML , Java , Firebase , ML
- **Game (Tic Tac Toe)**
Tech Stack : Android , XML , Java , Firebase
- **ToDo List**
Tech Stack : Android , XML , Kotlin , Firebase
- **Commentor (AI Agent)**
Developed an AI-powered Telegram bot that analyzes uploaded source code to identify errors, automatically add meaningful comments, and provide clear explanations for improved code understanding and debugging.
- **Fetch (AI Agent)**
Developed a Telegram bot that extracts color codes and font-family details from uploaded image, enabling quick analysis and reuse of design assets.

HOBBY

- Cricket
- Drawing
- Foodie
