

MEET PRAJAPATI

Mobile Application Developer | AI Automation Engineer
+91 9023968492 | [Email](#) | [GitHub](#) | [Portfolio](#) | Vadodara, Gujarat, India

PROFESSIONAL SUMMARY

Results-driven Mobile Application Developer and AI Automation Engineer with hands-on experience building production-grade Android and cross-platform apps. A genuine fast learner who rapidly adapts to new technologies and solves complex errors with speed and precision. Proficient in React Native, FlutterFlow, Java, Kotlin, and Android Studio, with strong expertise in Firebase, Supabase, and REST APIs. Experienced deploying backend to Railway. Experienced deploying AI agents via n8n and Make.com; currently pursuing MCA at SVIT (CGPA: 8.00), BCA CGPA 8.32.

TECHNICAL SKILLS

Mobile Development: React Native, FlutterFlow, Android Studio, Java, Kotlin, XML, JavaScript

Mobile UI/UX: Material Design, Responsive Layouts, Figma, Clean Architecture, MVVM

Backend & APIs: Node.js, REST APIs, Supabase, Firebase, PostgreSQL, MySQL, MongoDB

AI & Automation: n8n, Make.com, AI Sensy, OpenRouter, WhatsApp Business API, Gmail API, Slack API, Airtable

Tools & Platforms: Git, GitHub, Railway, Android Studio, Google Play Store, Visual Studio, Vercel, Netlify

Languages: Java, Kotlin, JavaScript, TypeScript, Python, C, C++

EXPERIENCE

Trustopay | Remote

Mobile & Full-Stack Development Intern Jan 2026 – Jun 2026

- Built and deployed a React Native mobile app for invoice generation, quotation management, and recurring billing with secure authentication and role-based access control.
- Integrated Supabase real-time database with Railway-hosted backend for sub-second synchronisation across mobile clients under concurrent load.
- Designed and deployed n8n AI automation workflows to streamline internal business processes, reducing manual task handling by an estimated 40%.

MOBILE APPLICATION PROJECTS

Trustopay – Invoice & Billing Management System (Mobile App)

Tech: React Native, TypeScript, Supabase, Railway, PostgreSQL, REST APIs | [GitHub](#)

- Built a full-featured React Native app for invoice generation, quotation management, and recurring billing with secure user authentication and role-based access control.
- Integrated Supabase real-time database for live cross-device sync and deployed a production-ready signed APK optimized for mid-range Android devices.
- Implemented TypeScript throughout the codebase to enforce type safety, reduce runtime errors, and maintain a scalable project structure.

SPORTLETIX – Smart Sports Gear Recommendation App

Tech: Android Studio, Java, Firebase, Machine Learning, Signed APK Deployment | [GitHub](#)

- Built an Android app that recommends personalized sports gear based on user body measurements and physical profile using an integrated Machine Learning model.
- Integrated Firebase for real-time data storage and authentication; delivered a Material Design UI optimized for broad Android device compatibility.
- Packaged and deployed a production-grade signed APK ensuring secure distribution across Android versions.

Smart ToDo List Application

Tech: Android Studio, Kotlin, Firebase, Signed APK Deployment | [GitHub](#)

- Built a productivity Android app in Kotlin with task creation, categorization, priority tagging, and Firebase-powered cloud sync across devices.
- Implemented MVVM architecture with LiveData and ViewModel; deployed a signed APK with Firebase Authentication for secure persistent task management.

AI AUTOMATION PROJECTS

Orion – Multi AI Agent System

Tech: HTML5, CSS3, JavaScript, Python | [Live](#) | [GitHub](#)

- Architected a modular multi-agent AI system capable of handling diverse tasks concurrently, including Q&A, code analysis, and workflow automation, with a Python-based orchestration layer for plug-and-play agent integration.
- Deployed on Vercel with a responsive frontend interface enabling seamless user interaction across multiple AI agents simultaneously.

WhatsApp AI Agent – Startup Grants & Updates

Tech: Make.com, WhatsApp Business API, AI Sensy, Facebook Manager, Airtable

- Developed a WhatsApp-based AI agent delivering real-time startup grant alerts and personalized business insights through a Pro Plan subscription model.
- Integrated Make.com automation with AI Sensy and Facebook Manager to manage subscriber lists, trigger message flows, and track engagement metrics in Airtable.

HR Screening AI Agent

Tech: n8n, Gmail API, LinkedIn / Indeed API, Slack, Airtable

- Automated end-to-end HR candidate screening with an n8n workflow that ingests applications from LinkedIn, Indeed, and Gmail, scores candidates against job criteria, and notifies HR teams via Slack.
- Reduced manual screening effort by an estimated 60%, enabling HR teams to focus exclusively on pre-qualified shortlisted candidates stored and tracked in Airtable.

Invoice Reader AI Agent

Tech: n8n, Gmail API, Platform APIs, Airtable

- Built an AI agent that automatically reads incoming invoice emails, extracts key fields (vendor name, amounts, due dates, line items) using NLP, and logs structured data into Airtable.
- Eliminated manual data entry for accounts payable workflows, significantly reducing processing time per invoice and lowering human error rates.

EDUCATION

Sardar Vallabhbhai Patel Institute of Technology (SVIT) | Vadodara, Gujarat

Master in Computer Applications (MCA) 2024 – 2026 | Current CGPA: 8.00

Dadabhai Navroji Institute of Computer Application | Gujarat

Bachelor in Computer Applications (BCA) 2022 – 2024 | CGPA: 8.32

ACHIEVEMENTS & HIGHLIGHTS

- Built 3+ production-grade Android and React Native mobile applications with signed APK deployments, real-world user flows, and optimized performance across device ranges.
- Designed and deployed 6+ AI automation agents using n8n and Make.com for HR screening, invoice processing, WhatsApp alerting, and code analysis use cases.
- Mobile & Full-Stack Internship at Trutopay — delivered a React Native app and n8n AI automation workflows within a 6-month engagement, reducing manual task handling by 40%.
- Consistent academic performer: BCA CGPA 8.32 and MCA CGPA 8.00 (ongoing) at SVIT, Vadodara.
- Proficient in deploying production-ready apps on Google Play Store, Vercel, Netlify, and Railway with CI/CD best practices.
